## Summary

### About Me

I am an enthusiastic undergraduate student pursuing a Bachelor of Engineering in Computer Science and Engineering. My academic journey has equipped me with a solid foundation in various computer science disciplines, including programming, algorithms, data structures, and software development.

### Professional Interests

I have a keen interest in Python and C++ development. I am passionate about leveraging these technologies to solve real-world problems and am constantly seeking opportunities to apply my skills in practical settings. I am also currently learning parallel programming to enhance my understanding of efficient computing.

### Skills and Expertise

Programming Languages: Python, C++

Web Development: Flask, Django, HTML, CSS, JavaScript

Database Management: SQL

Software Development: Agile methodologies, version control with Git

Game Development: OpenGL, Unity and Unreal

Problem Solving and Critical Thinking

### Projects and Achievements

Developed simple games using compatible OpenGL.

Worked on websites for startup companies, including Bright Product Ventures and Sanarys.

Contributed to projects at Cambrian Labs, a part of my college.

### Goals and Aspirations

I aim to further my knowledge and skills in computer science and engineering by engaging in internships, research projects, and collaborative endeavors. I am particularly interested in contributing to innovative projects and pursuing a career in software development.

### Personal Interests

Beyond academics, I enjoy playing the piano and have good experience with it. Additionally, I find joy in coding challenges, video games, reading tech blogs, and playing chess. These activities help me stay motivated and continuously learn new things.

---

## Education

Cambridge Institute of Technology

Bachelor of Engineering - BE, Computer Science · (December 2021 - July 2025)
